**Subject:** RE: San Jacinto Update

Gary – They should finish installing the camera system today and all maintenance activities described in the work plan we submitted earlier this week are complete. Two additional small (1x1 to 1x2 foot) locations were identified in the final probing on Tuesday, and those will also be addressed with more rock added today. Valmichael approved addressing the final two maintenance areas while he was on site.

Please let me know if you need anything else. The attached is the daily report for Tuesday's activities and I should have yesterday's report to you later today.

Thanks,  
David

David,

Can you send a brief summary of the work completed at the site this week? Would appreciate it this morning so we can let the folks here know the progress.

Thanks,

9769001
